

## How to Insert a Hit Counter into Your FrontPage Web

1. A hit counter will let you know how many people have visited, or "hit," your Web site. In order to insert a hit counter, open the page where you'd like to have the hit counter located.
2. Place your cursor where you'd like the hit counter to be inserted.
3. Click **I**nsert on the menu bar. On the menu that drops down, click on **A**ctive **E**lements, then slide your cursor over and click on **H**it Counter...
4. A window will pop up. Choose the style numbers you'd like your hit counter to have and click on the circle next to it to select it.
5. Click **OK**.
