

Ben Franklin the Scientist

Describe the experiment

What was the purpose of the experiment?

How did it impact society at the time?

Can we see evidence of the experiment today?

What is one way to improve Ben's experiment? What would you recommend he change?

Did it lead to any other experiments or inventions?

Group Discussion Question:

Do you think this is the most important experiment conducted by Benjamin Franklin?

Include in your presentation evidence to support the experiment the group believes to be the most important or had the biggest impact (either directly or indirectly by leading to other ideas).
