

## Bridge Observation Sheet

Use the various resources provided to explore beam, arch, and suspension bridges. Record your observations.

As you explore various pictures of bridges, consider the following questions:

Is the bridge flat, does it arch, or does it droop?

Do cables hold it up?

Does it have supports underneath that hold it up?

Do you notice patterns among bridges that were built over water?

Do you notice patterns in bridges that were built over an area of land?

Type of Bridge	My Observations
<b>Arch</b>	
<b>Beam</b>	
<b>Suspension</b>
