

About Dr. Nancy Sulla

Dr. Nancy Sulla is an author, national speaker, and thought leader in transforming learning environments to build student engagement, empowerment, and efficacy. As the creator of the *Learner-Active, Technology-Infused Classroom* and founder of IDE Corp. – Innovative Designs for Education, Dr. Sulla leads her educational consulting firm in the pursuit of equity-focused instructional design, positioning students to change the world.

Designing student-driven classrooms is the subject of Nancy's first book, *Students Taking Charge: Inside the Learner-Active, Technology-Infused Classroom*. Her second book, *It's Not What You Teach But How: 7 Insights for CCSS Success* offers critical insights for achieving levels of standards-based learning focused on understanding and application. In her latest book, *Building Executive Function Skills: The Missing Link to Student Achievement* she frames executive function skills as a requirement for mastering six increasingly complex life skills that should be the goal of any school: conscious control, engagement, collaboration, empowerment, efficacy, and leadership. Nancy is currently working on three updated versions of her first book: K-5, 6-12, and leadership.
