The World.

Support Teachers in Navigating New and Challenging Times!

Together, IDE Corp. and EdQuiddity Inc provide live (on-site or remote) and virtual professional learning experiences for teachers and administrators to address current instructional issues, including:

- Learning Acceleration and Academic Recovery
- Culturally Responsive Pedagogy
- Social and Emotional Learning
- Individualized/Personalized Learning
- Executive Function
- Formative Assessment and Facilitation
- Technology Infusion
- and more

We prioritize student engagement, empowerment, and efficacy through specific structures and strategies to address the above needs. You identify the needs you wish to support your teachers in addressing, and we will custom-design a summer professional learning experience followed by yearlong, ongoing, just-in-time support.

Make Summer Professional Learning Count!

We bring over 30 years of experience innovating instruction to this time of significant change, and we have a proven track record of showing results during the pandemic. Let us work with you to craft a summer experience for your teachers that they will appreciate.

For some teachers (your innovators and early adopters) - Support them in pursuing comprehensive instructional innovation through our proven framework!

- ☐ **Design Classrooms for Engagement, Empowerment, and Efficacy**
through a comprehensive look at classroom design to produce the ultimate learning environment that addresses all of the aforementioned issues — whether students are learning fully in school or at home. This multi-year engagement in deepening educators' understanding

of instructional design through our framework, the *Learner-Active, Technology-Infused Classroom (LATIC)*:

- ☐ Engages and motivates students through problem-based learning that depends on a series of paradigm shifts that develop across the years.
- ☐ Provides students with carefully designed structures to take responsibility for their own learning, including self-assessment, reflection, and self-advocacy.
- ☐ Positions the teacher to ensure learning for all and create strong student-teacher relationships through personalized facilitation.
- ☐ Promotes Culturally Responsive Pedagogy throughout the structures and strategies and instructional design.

Logistics

- Teachers attend 8 days of training, receive job-embedded support throughout the school year, and become the force of change for shifting the pedagogy of a school.
- Fees are based on the number of participating teachers.
- The summer experience will be conducted either as a fully on-site experience, a fully remote experience, or a hybrid experience, based on your needs. The workshop days typically run from 9:00 a.m. until 3:00 p.m.
- Participating teachers will need a copy of the relevant grade-level edition of the book *Students Taking Charge* (2018 version), and *Reinventing the Classroom Experience: Learning Anywhere, Anytime*. (Dr. Sulla's publisher is currently offering discounts on the purchase of both books.)
- If any participating teacher works with a special education co-teacher, we invite them to attend at no additional cost.
- We strongly encourage school leaders to attend in order to immerse themselves in this framework and support their teachers.

For all teachers - Support them in focusing on one or more goals through a four-day summer experience, beginning the journey to more comprehensive instructional innovation! Let us customize a plan for you based on your needs. Tell us more about your organization!

- ☐ **Academic Recovery and Learning Acceleration** - Accelerate student achievement through deconstructing power standards and designing related individualized learning activities.
- ☐ **Leveraging Formative Assessment and Facilitation for Student Achievement** - Strategically use data to drive instruction, create strong relationships with your students, and improve retention of learning.
- ☐ **Building Executive Function and SEL Skills** - Focus on the building blocks of all student success (executive function and SEL) through deliberate structures, activities, and facilitation strategies.
- ☐ **Maximizing Learning Time Through Blended Learning Environments** - Navigate the balance between technology-focused activities and live teacher engagement to maximize student engagement and empowerment.

- ☐ **Designing Personalized Learning Environments** - Increase student choice and voice, putting students in charge of their own learning, reflection, and advocacy.
- ☐ **Fostering Student Empowerment Through Structures** - Develop a series of structures that will promote student empowerment, such as a “Great Student Rubric,” “Differentiated Activity List,” “Learning Dashboard,” and more.
- ☐ **Engaging Students with the 5Ps of PBL** - Increase student engagement and, thus, motivation, by teaching through real-world problems and challenges with problem-based, project-based, place-based, profession-based, and pursuit-based learning.
- ☐ **Designing Equitable Learning Environments** - Explore the 7 lenses of equity (opportunity, access, representation, empowerment, relationships, authenticity, and cultural responsiveness), and work to design classrooms that infuse these lenses throughout instructional activities, participatory structures, assessments, instructional resources, language, and the physical/virtual setting.

Leadership Summits are powerful and much-needed summer experiences to inspire, energize, and outfit school and district leaders for a new school year. Whatever the district’s goals, successes, or challenges, the summit can expand collaboration and innovative thinking to chart a pathway for a more powerful future. Author, Tanya Bosco, uses her 10 mindsets of leadership to tackle new ideas, encourage reflection, and build the leadership repertoire for moving forward toward their collective and individual goals. Participating administrators will need a copy of *Students Taking Charge Implementation Guide for Leaders*.

Overview of Online Professional Learning Services

- ☐ **Self-Paced Online Professional Learning Experiences (PLEs)** include 25 hours of content to allow educators to get just-in-time support and ideas as well as to expand their knowledge and possibilities. Each experience focuses on a specific topic (listed below) presented across a number of modules, which can be navigated in any order and will position educators for success in any learning environment. \$99 per login for two-year access (discounts based on volume).

Our current Self-Paced Online Professional Learning Experiences include:

- *Reinventing the Classroom Experience: Learning Anywhere, Anytime*
- *The Equity Lens: Reflecting on Your Learning Environment*
- *Anchoring Learning and Engaging Students Through the 5 Ps of PBL*
- *Building Executive Function and SEL: Skills for Life*
- *Increasing Engagement with Differentiated Activity Lists* (coming soon)

- ❑ **Virtual Learning Communities (VLC)** offer teachers and administrators the opportunity to engage in online workshops facilitated by a consultant, over a five-week period (2 weeks in the summer). This personalized online learning environment allows participants to engage at times that are convenient for them and work in a more self-directed mode, while also meeting with and having access to consultants. The most current schedule and course lists are available at www.edquiddity.com/VLC. (We can provide custom VLCs just for your organization.) An optional 5-hour add-on allows educators to conduct an action research project in their school at no additional fee. Each course is \$595 per teacher, or \$4,950 for a 10-seat registration.
- ❑ **MyQPortal** is an online collection of resources for designing and implementing student-driven learning that produces engagement, empowerment, and efficacy. New materials are added on a regular basis. Subscribers receive a monthly newsletter with tips, ideas, and a summary of new materials. Following the pandemic, we are offering a special rate of \$995 per school for a yearly subscription.

Contact Us to Co-Create a Custom-Designed Solution

IDE Corp. and EdQuiddity Inc offer a variety of in-person, remote, synchronous, and virtual options for educators on all topics related to instruction. Together, we are helping teachers and administrators everywhere deliver a unique and powerful approach to learning. We want students and teachers to thrive in the new school year, moving forward with significant learning gains. We're seeing this in our client schools and are excited about the possibilities of a partnership with you. #DoSomethingDifferent

Contact Nicole (Nik) Koch, Vice President of Client Relations, to brainstorm ideas at: nkoch@idecorp.com. We are happy to offer suggestions whether or not you decide to partner with us. Just let us know how you want to connect:

- Nik's cell: 973-615-3842 or give us your phone number, and a good time to call
- Video conference (give us a good time to connect, and we'll send you a link)
