

Professional Learning Offering in Maximizing the Remote Snow Day

What if you could design a learning environment for your students that works as effectively at home as it does in school, with seamless transitions back and forth? IDE Corp.'s **11 Aspects of Remote Learning** support the shift from “brick 'n' mortar” instruction to remote learning so that learning continues anywhere, anytime. One thing we learned from the COVID-19 pandemic is that there is always a chance schools will close for unforeseeable reasons, such as weather or a virus outbreak.

IDE Corp. is offering a **one-day professional development experience** for educators to explore strategies to transform unplanned snow days into valuable opportunities for engaging and empowering students in remote learning. The logistics are as follows:

Date: December 6, 2023, from 10:00 a.m. to 3:00 p.m. (ET)

Venue: Virtual (via Zoom)

Pricing: \$248 per person

Content Overview: Provide teachers with a comprehensive toolkit for making the most of remote instructional days through **IDE Corp.'s 11 Aspects of Remote Learning**. By the end of the day, participants will . . .

- Explore structures and strategies to seamlessly integrate the content and activities initially planned for in-person instruction into remote learning
- Explore and experience a range of digital tools and resources to facilitate engaging, interactive, and collaborative learning in the virtual classroom, making snow days as productive as traditional in-person instruction
- Design structures and strategies that can be implemented during virtual instruction to prioritize executive function and social-emotional learning skills
- Develop a snow day contingency plan that outlines roles, responsibilities, and clear communication channels for teachers, students, and parents
